

# NASA Basic Rifle Marksmanship Clinic for Adults with Disabilities Volunteer Information Form

When: September 12th 7:30 am – 4:00 pm (rain date September 19<sup>th</sup>)

Where: Holmen Rod & Gun Club, Holmen, WI

Thank you for your interest in volunteering with the North American Squirrel Association's second annual adaptive rifle marksmanship program! There are several opportunities for volunteering. Here are some of the roles with which you may be qualified to assist:

1. **Range Safety Officer:** This position requires that a person has supervised a range before and understands how to work in conjunction with several other Range Safety Officers. This program will need about five or six persons qualified for this. One person will be designated as the Head Range Safety Officer.
2. **Rifle Instructor:** This position requires that a person is confident in teaching others in basic rifle marksmanship safety and shooting skills. It is preferable that this person may have a background in Hunter's Safety, or other certifications like NRA Rifle Instructor, Boy Scout Leader or Appleseed Instructor. This person is in charge of their four person group on the range. The Rifle Instructor should ensure that any necessary equipment is at their shooting station.
3. **Rifle Assistant:** Rifle Assistants should have some background with firearm marksmanship. This position does not need much prior experience, but their main job is to coach the shooting mentor on filling out the Rifle Marksmanship Skills Checklist, and offer suggestions on how to look for the basics of marksmanship skills. Many times the Rifle Instructor and Assistant may work together with this. The Assistant can also help by running to get things like sandbags or benchrests if they are not already at their shooting station.
4. **Lunch Servers:** This program offers a free luncheon with donated dishes from the community. We welcome any of these donations graciously.
5. **Standby personnel:** For the safety of the program it is desirable to have persons certified in CPR/First Aid in the unlikely occurrence of an emergency. This position could also be a Physical Therapy or Occupational therapy person that can walk the shooting line and offer suggestions on positioning to avoid pain after the clinic. The first ever clinic was lucky to have several persons available to discuss recommendations for after care.
6. **Paperwork helpers:** This program has a lot of paperwork that has to be filled out before, during and after the program. Some are liability or photo consent (needs to be collected before going on the live firing range), and some are checklists and evaluations. This paperwork is very important to evaluate the programs efficiency.

A two-hour training session will occur (TBD) before the clinic. The Range Safety Officers, Rifle Instructors and Rifle Assistants are key players in this training. If a volunteer is unable to make the training date, they MUST connect with George Wilson prior to the clinic.

If there is a volunteer position you feel you best fit into, please let us know on the form below. We will try hard to get everyone to volunteer in a capacity they would like. Please feel free to contact George Wilson with any questions, comments or concerns, and thank you for your support in this program!
