

NASA Marksmanship Clinic for Youth Adults and Seniors with Physical Disabilities

Volunteer Information Form 2019
August 24th, 2019 7:30 am - 4 pm

Location: Chaseburg Rod and Gun Club, S1269 Sportsman Lane
Stoddard WI 54658
Clubhouse phone is (608) 483-2107.

Thank you for your interest in volunteering with the North American Squirrel Associations annual adaptive marksmanship program! There are several opportunities for volunteering so I will describe some of the roles you may be qualified to assist with.

Range Safety Officer

This position requires that a person has supervised a range before and understands how to work in conjunction with several other Range Safety Officers. This program will need about five or six persons qualified for this. One person will be designated as the Head Range Safety Officer.

Rifle Instructor

This position requires that a person is confident in teaching others in basic rifle marksmanship safety and shooting skills. It is preferable that this person may have a background in Hunter's Safety, or other certifications like NRA Rifle Instructor, Boy Scout Leader or Appleseed Instructor. This person is in charge of their four person group on the range. The Rifle Instructor should ensure that any necessary equipment is at their shooting station.

Rifle Assistant

Rifle Assistants should have some background with firearm marksmanship. This position does not need much prior experience, but their main job is to coach the shooting mentor on filling out the Rifle Marksmanship Skills Checklist, and offer suggestions how to look for the basics of marksmanship skills. Many times the Rifle Instructor and Assistant may work together with this. The Assistant can also help run to get things like sandbags or bench rests if they are not already at their shooting station.

Lunch Servers

This program offers a free luncheon with donated dishes from the community. We welcome any of these donations graciously.

Stand by personnel

For the safety of the program it is desirable to have persons certified in CPR/First Aid with the unlikely occurrence of an emergency. This position could also be a Physical Therapy or Occupational therapy person that can walk the shooting line and offer suggestions on positioning to avoid pain after the clinic. The first ever clinic was lucky to have several persons available to discuss recommendations for after care.

Paperwork helpers

This program has a lot of paperwork that has to be filled out before, during and after the program. Some are liability or photo consent (needs to be collected before going on the live firing range), and some are checklists and evaluations. This paperwork is very important to evaluate the programs efficiency.

A 2 hour training session will occur (TBD) before the clinic. The Range Safety officers, Rifle Instructors and Assistants are key players in this training. If a volunteer is unable to make the training date, they MUST connect with George or John before the clinic.

If there is a volunteer position you feel you best fit into, please let us know. We will try hard to get everyone to volunteer in a capacity they would like. Please feel free to contact George or John with any questions, comments or concerns, and thank you for your support in this program!
